GWPT - Geissbühler Weber & Partner Token

Token Economics - GWPT

Terms and Conditions of Use

General

- The Geissbühler Weber & Partner Token (GWPT) is a digital voucher. The token can be redeemed for services provided by Geissbühler Weber & Partner (gwp), and is to understand as a utility token.

Value

- The discount is equivalent to a service from gwp worth of CHF 100.
- The GWPT in the quotation are excluding value added tax, any other taxes, fees, duties, licenses or levies now or in the future imposed upon the service.

Cumulation

- The cumulation of tokens depends on the service volume and is classified as follows:
 - >= 5,000 CHF → max. 3 GWPT
 - >= 10,000 CHF → max. 5 GWPT

Distribution and Transfer

- The token is not publicly traded and will be distributed by gwp free of charge.
- gwp only accepts tokens from a registered company or a company representative.
- The GWPT has no technical restriction on the transferability nor is any “Whitelisting” in place. As GWPT are ERC-20 tokens, a minimal amount of ETH ($\approx 0.0002-0.001$) is required for the transfer to cover the transaction fees (GAS).

Justification

- Whenever the GWPT is redeemed for a service from gwp, the value of the token (the discount) is always determined by the service provider (gwp) and do not grant any rights towards the counterparty (client). gwp reserves the right to invalidate the token's value.
